

**Benelec 2 Way Heavy Duty Deck Mount**

1” 14 TPI Thread

The 02735 is an adjustable antenna mount designed to articulate for horizontal, vertical, or inclined mounting surfaces. Constructed entirely from glass-filled nylon, it is lightweight and well-suited for shipboard and fixed station applications. The male mounting thread conforms to the marine standard 1"-14 TPI.

**OPERATION**

Suitable for shipboard and fixed station applications. Lifting the handle to the vertical position disengages the V-grooves, allowing the top antenna mounting section to swivel through 180°. To secure it in place, return the handle to the horizontal position. The locking screw on the lower section can be loosened to adjust the base through 180° at right angles to the top section, then re-tightened to lock it in position.

Refer to the Marine Antenna Installation Instructions provided with your antenna for detailed guidance on proper installation and use.

**FEATURES**

- All glass filled Nylon Construction
- Accepts all antennas with 1” – 14 TPI female thread 1” long
- Can be mounted to any angled flat surface
- Two-way 180° at right angles to each other

**Note:** Mounting screws not supplied. Two main Pivot bolts supplied.

**PACKAGING**

1 Bracket Per Box: 130 x 115 x 65 mm  
 Carton: 20 pcs/carton 240 x 240 x 240 mm - Gross Weight: 9.5 kg  
 Carton: 40 pcs/carton 340 x 290 x 260 mm - Gross Weight: 19.5 kg
