UHF Socket Panel Mount

The 04114 mount is essentially a flanged SO-239 (UHF female) connector designed to mount on many mobile radios and mate externally with antenna coax that have PL-259 UHF male plugs; and internally via a soldered centre and solder tab shield. The construction features Brass metal parts with Nickel or Gold plated surfaces as appropriate. It utilizes a bakelite dielectric. The shield screw thread connection conforms to the proper UHF PL-259 standard imperial thread (unlike some competitor 'metricized' parts).

APPLICATION

Terminating Coaxial cable with radio equipment

PACKAGING

Individual, N.W. 16g

WARRANTY

12 months (Please refer to [Benelec Terms & Conditions](#))

FEATURES

- Nickel Plated brass.
- Gold plated centre-pin
- Bakelite dielectric
- Reliable, Robust, Durable
- Solder tab centre connection
- Solder Tab shield connection (1.7mm hole)
- 18mm AF nut
- Useable up to 520MHz
- Flange 20mm across
- Requires 15.9mm panel hole (or 14.8mm "D")
